

Technical data sheet:

Matrix fibreglass roofing reinforcement

Product application

- E-glass chopped strand mat bound by emulsion adhesive.
- For application by hand lay-up.
- To be applied with Matrix Roofing Resin and Matrix Roofing Topcoat (for reinforced Unsaturated Polyester).

Product properties:

- Weights – 300, 450 and 600 g/m².
- Even thickness = even coating, even stiffness.
- Quick and easy to wet out.
- Easy to process into difficult shapes, enabling good reinforcement in corners etc.
- Excellent mechanical strength of finished roof.

Technical specification

Product code	Roll width (mm)	Areal weight (g/m ²)	Compatible resin	LOI %	Moisture content %
F-CSM	75-1000	300-600	UP	2.0-8.0	<0.20

Packaging

- Rolled onto cardboard tubes, protected by plastic bags, and stored in cardboard boxes, 9 per pallet.
- Average roll weight 33 kg.
- Standard roll width 1000mm.

Storage

- The product MUST be kept dry inside its plastic bag.
